

# \$WANG Airdrop For March 2024

## Brief:

- 300,000 WANG to be distributed to all who enter, and 10,000 in bonuses to the top 10 Zealy participants
  - As of writing 1 \$WANG = \$1.23
  - Stake 0.2 Ayin – a DEX coin on the Alephium blockchain
  - Complete the Zealy tasks - <https://zealy.io/cw/chengiswang/> - Follow @ChengisWang on X, like, retweet and comment & make a funny meme
  - Everyone who completes the tasks will get the airdrop on the 1<sup>st</sup> of April 2024
  - The coin to stake is on the Alephium blockchain. If you are familiar with crypto, this should not take you more than 20 minutes.
- 

The March 2024 \$WANG airdrop will be distributed equally to addresses that stake 0.2 AYIN at:

<https://www.ayin.app/xayin>

Ayin is the token for the Ayin DEX on the Alephium blockchain. As of writing the value of one Ayin is \$26.66. Staked Ayin currently earns 38% APR (not including auto-compounding). The rate is variable, based on how much is staked in total.

You can find the current price of AYIN here -

<https://mobula.io/pair/25ywM8iGxKpZWuGA5z6DXKGcZCXtPBmnbQyJEsjvjjWTy>

Only around two months ago 1 AYIN was \$1.50 – you can expect similar growth for \$WANG

Each staker will receive the same amount of \$WANG. The amount you stake over 0.2 AYIN does not influence the size of the airdrop you will receive.

The Zealy campaign may be found at: <https://zealy.io/cw/chengiswang/>

The amount of \$WANG to be airdropped: 300,000

Amount of time it will take newcomers to Alephium to perform: about 15-30 minutes

Amount of time it will take Alephium holders to perform: 2-3 minutes

---

**\$WANG** is not a meme coin. It is the first mystical currency to be launched on blockchain. Holding \$WANG endows the holder with the qualities of Alephium and its founder Cheng Wang. You become more secure, quicker, more economical and more efficient. \$WANG's powers are retroactive. Once you hold \$WANG, it will delve into your past and correct mistakes. A number of holders testify that the Alephium they bought at \$0.06 and then paper-handed has been returned to their wallets.

## What Is Alephium

Alephium is the only blockchain that marries the security of Bitcoin, the smart contract capabilities of Ethereum and the scalability of Solana. Its mastermind Cheng Wang is an immortal who periodically visits this temporal realm to save humanity from the clutches of the money changers, bankings scams, high transaction costs and debased currencies.

Alephium is capable of 10,000 TPS on a proof-of-less-work blockchain and fixes the problems associated with the billions stolen from Ethereum wallets due to permissions. It has a bustling and feverish community with a very high TVL for its market cap.

It is promoted by a number of prominent cryptocurrency personalities, including:

<https://twitter.com/ElonTrades>

<https://twitter.com/CryptoWizardd>

<https://twitter.com/BraverCrypto>

<https://twitter.com/cryptocevo>

<https://twitter.com/Eunicedwong>

[https://twitter.com/Altcoinist\\_com](https://twitter.com/Altcoinist_com)

<https://twitter.com/CryptoRRR>

[https://twitter.com/crypto\\_banter](https://twitter.com/crypto_banter)

<https://twitter.com/IncomeSharks>

Alephium is tipped by many to enter the top 10, 20, 50 cryptocurrencies. And its mystical coin will follow. Both are still at low caps of \$246m and \$1.1m respectively.

Getting airdropped \$WANG now is equivalent to having got early Bonk or other similar tokens. Miss Bonk? Get Wang.

Find out more about Alephium at: <https://alephium.org/>

## Where To Hold Alephium

Native Alephium can be held in the official wallets:

<https://alephium.org/#wallets>

It is recommended to use a browser extension wallet.

## Where To Buy Alephium

If you don't hold AYIN or Alephium, you will need to buy it from one of the following exchanges:

## 1) Uniswap (more expensive)

Alephium can be bought on Uniswap as an Ethereum token: <https://app.uniswap.org/swap?outputCurrency=0x590f820444fa3638e022776752c5eef34e2f89a6>

And then bridged to then Alephium blockchain: <https://bridge.alephium.org/>

Bridging takes around 15 minutes. Make sure you leave the page open, or you will need to undergo a recovery process.

Here is a video guide: <https://youtube.com/watch?v=xoYVzbwBAjg>

## 2) CEXs (cheaper)

Or you can buy Alephium on its native blockchain from the following exchanges:

MEXC: [https://www.mexc.com/exchange/ALPH\\_USDT](https://www.mexc.com/exchange/ALPH_USDT)

Gate: [https://gate.io/trade/alph\\_usdt](https://gate.io/trade/alph_usdt)

BitMart: [https://www.bitmart.com/trade/en?symbol=ALPH\\_USDT](https://www.bitmart.com/trade/en?symbol=ALPH_USDT)

XeggeX: <https://xeggex.com/markets>

CoinEx: <https://www.coinex.com/exchange/alph-usdt>

CoinMetro: <https://go.coinmetro.com/exchange/alph-to-eur>

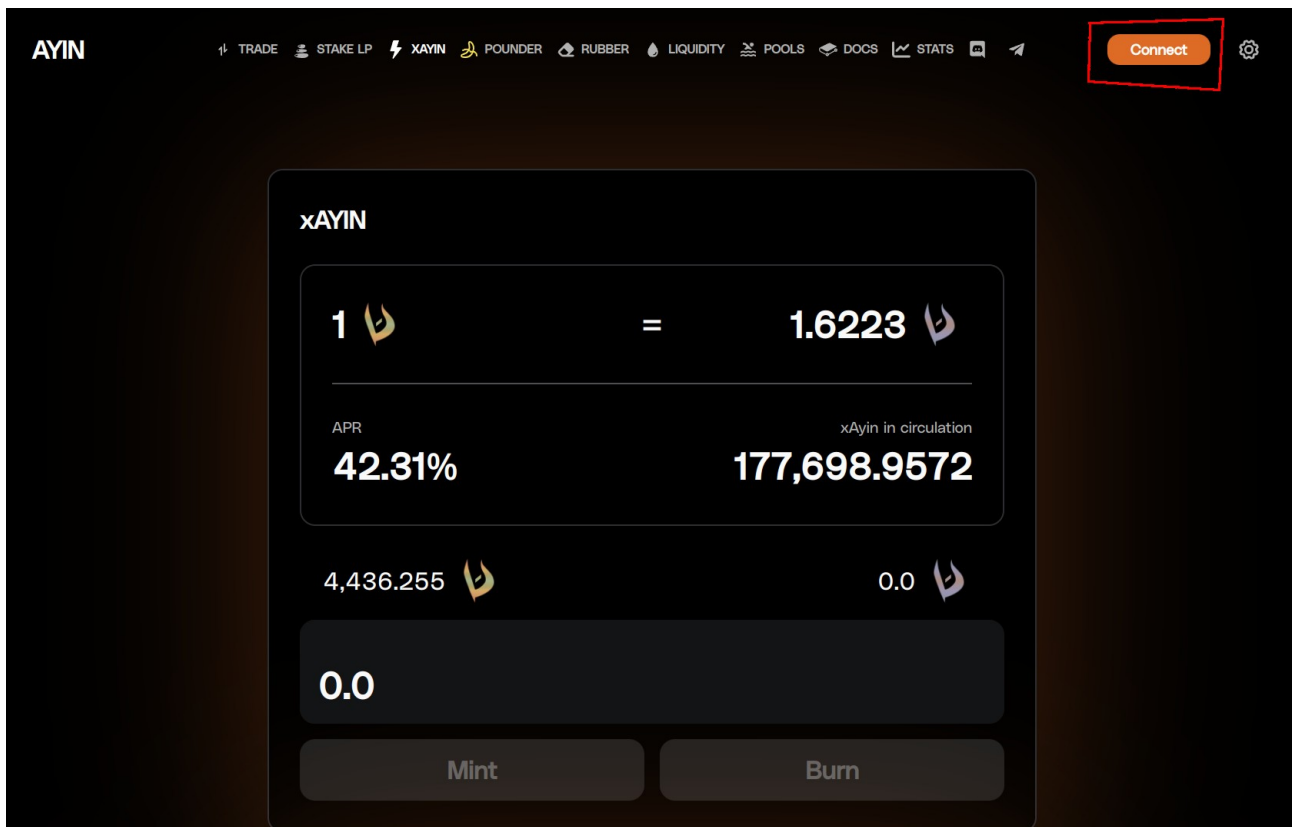

Bilaxy: [https://bilaxy.com/trade/ALPH\\_ETH](https://bilaxy.com/trade/ALPH_ETH)

TradeOgre: <https://tradeogre.com/exchange/USDT-ALPH>

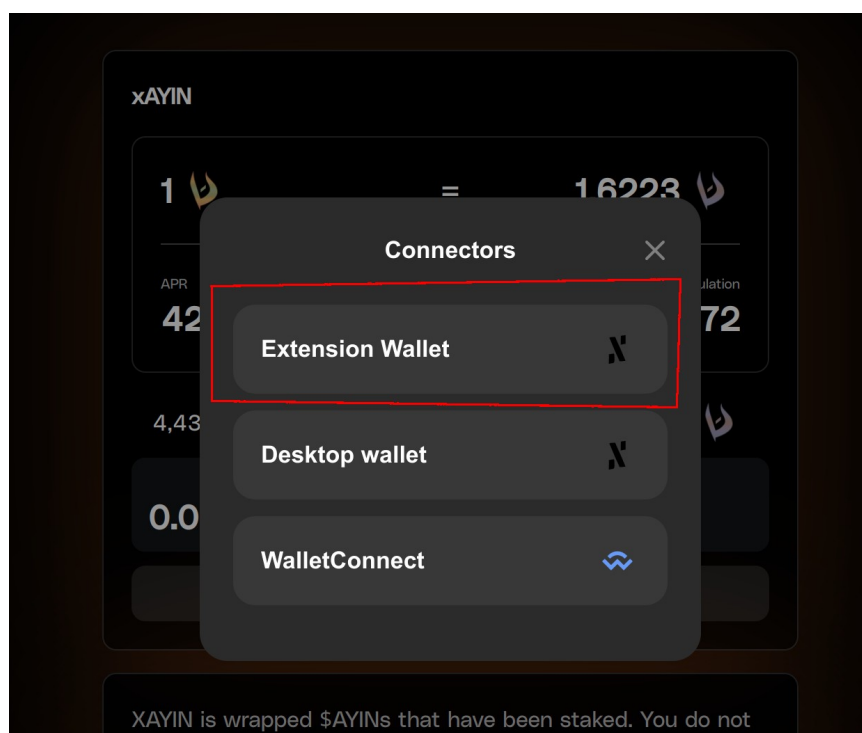

## How To Stake Ayin

1: Go to <https://www.ayin.app/xayin>

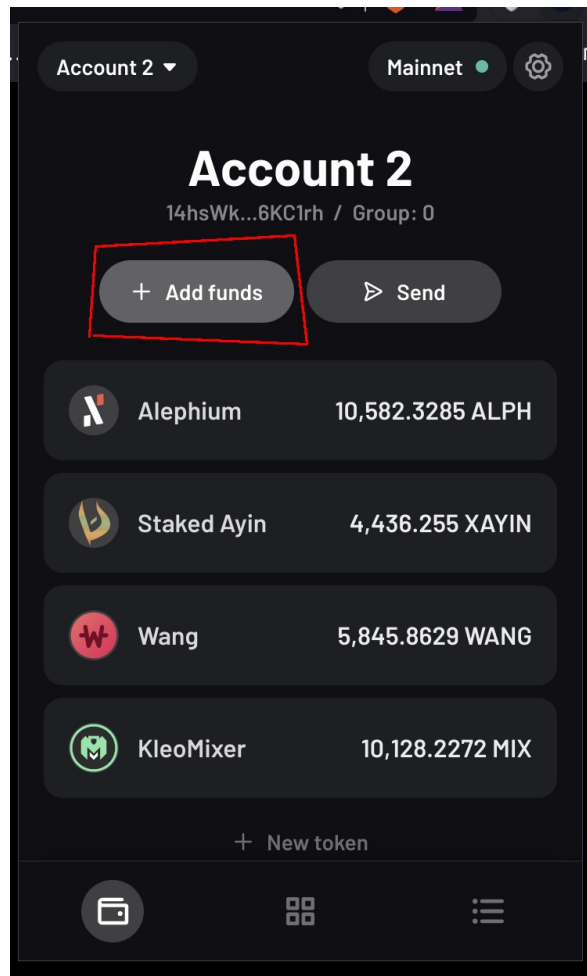

2: Connect your Alephium wallet

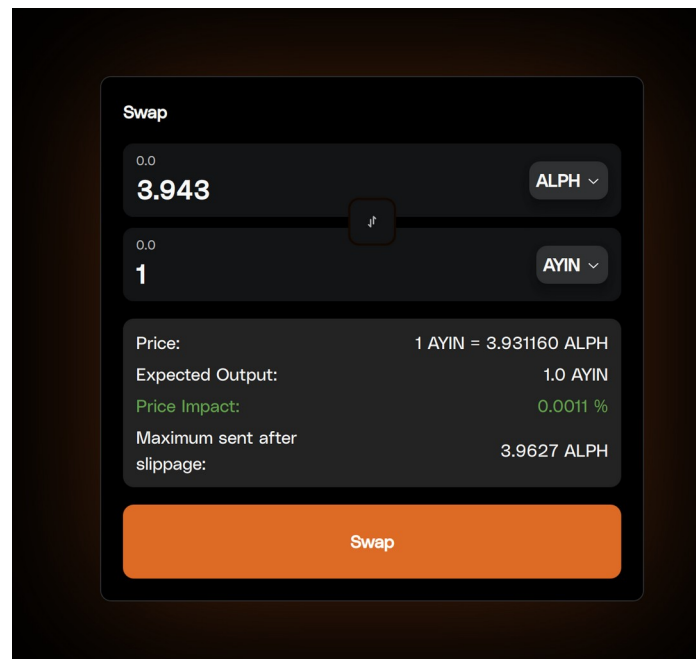

3: Select your wallet type (suggested – browser extension)

4: Deposit your Alephium by pressing “Add Funds” and send your Alephium to the provided address (if you bought on an exchange); if you bought via Uniswap, see the above bridge guide

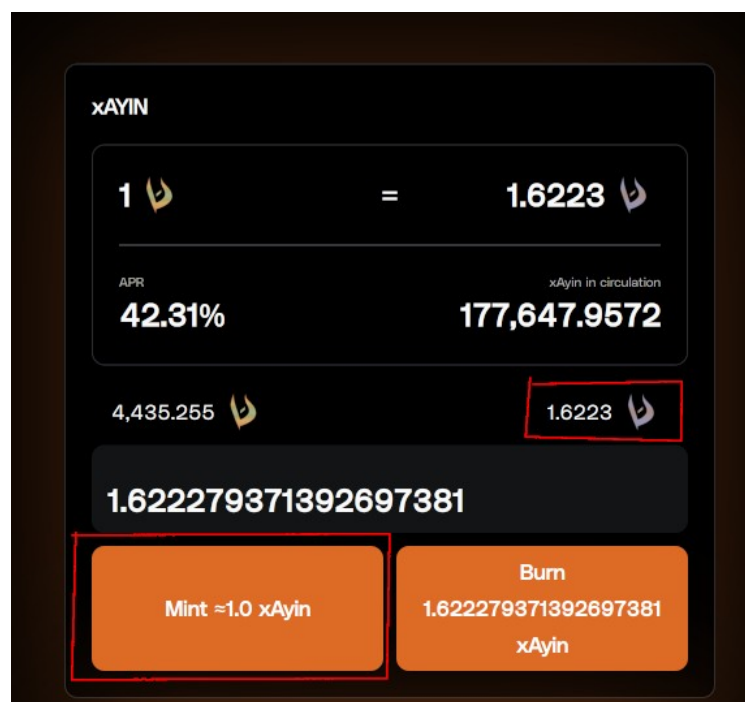

5: Buy at least 1 AYIN from the swap page: <https://www.ayin.app/swap>

N.B. swaps can take around one minute to complete.

6: Once you have received at least 1 AYIN, stake it on the staking page: <https://www.ayin.app/xayin>

Once staked, you will be shown as having a balance on the left hand side, as above, the balance is 4,435.255.
